Of the Eclipſes which ſhall happen this preſent yeare of our Lord God. 1633.

There ſhall this yeare, be but onely Two Eclipſes of the Sunne, to be obſerued by the Inhabitants

vpon this our Terrestiall Globe: whereof the first shall be seene in this our Horizon: but the latter thereof shall happen in the orientall parts of the world and not to bee seene of vs.

Of the First Eclipse of the Sunne.

VPon the 29 of March being Friday, about 2 of the clocke in the afternoone, according to our Julian or English account: but on the 8 of Aprill according to the Gregorian or forreine Computation, will apparently be seene a small Eclipse of the bright Globe of the Sun here with vs: & also it may be obserued in France, Spain, Italy, in the Regions of Affrica, Barbara, Moroco, Azanaga, the fortunate Ilands, and in the Iland of St. Paul, St. Cruce, and it the parts of Brasill, where the Longitude is 358 deg: or 360, and 4 deg: of North Latitude, both the Luminaries being at the time of the obscurity of the Sunne, coniopned in the 18 degr: or thereabout of Aries neere Caput Draconis, in a signe of the fiery Triplicity, naturally hot and dry, of complexion cholericke, masculine, orientall, diurnall, moueable, the house of Mars, and the exaltation of the Sunne, &c.

The poynts or deg: Eclipsed are 5. and 7. min: The totall duration, from the beginning to the ending, will be 2. hou. and 8. minutes.

Of the Second Eclipse of the Sunne.

THere shall vnder appeare another great Eclipse of the Sun, vnto the view of the people which doe inhabite towards the East from vs, which is about de Diego, and the Ilands of Maldiua, & Madagascar, & Malabra, Calecut, Goce, Malacca, Sumatra, & Iana with the parts there

there next adioyning, vpon the 23 of September according to our computation, but after the reformed yeare on the 3 of October, the great lights being at that time coniuncted about the 9 degree of Libra, not far from Cauda Draconis, in a signe of the ayrie triplicity, naturally hoate and moyst, of complexion sanguine, masculine, occidental, moueable, and the house of Venus. The degrees Eclipsed will be 11. and 33 min: The totall continuance, will be 3 hou: and 30 minutes.

The great coniunctions of great starres,
The Eclipse of Sunne and Moone:
Doth threat great dearth, great death and warres,
If we repent not soone.
Now God aboue, and wrath aboue,
And Heauen aboue relent:
And man beneath, and sinne beneath,
And Earth beneath, Repent.

Briefe Rules, and necessarie obseruations, concerning Bleeding, Bathing, Purging, and Sweating, *according to the motions of the Moone.*

WHen the weather is extreame hote or cold, it is not then conuenient, either to let blood or to purge, vnlesse some great necessitie doe require it: yet notwithstanding, if this bloodletting be for the Phrensie, the Apoplerie, for a continual head-ach proceeding of choller or blood, or any hot burning Ague, or other extreame paine, a man in such a case may not tarrie a chosen time, because the patient might miscarrie in the meane season. But in this foresaid case of extreamity, blood is not to be let in such a quantity and otherwise it would, if a chosen time might be expected.

The best time to let the Phlegmatick blood, is when the Moone is in ♍, or ♐, the head & thighes excepted.

For the Melancholike the Moone being in Libra, or Aquarius, the buttockes and legges excepted.

For the Cholericke, the Moone being in Cancer, Scorpio, or Pisces, the brest and feete excepted.

For the Sanguine all be good which before is named.

In Spring time, let blood at the right side.

In Harueſt time, let blood at the left side.

For Bathing.

BAthings, are commonly vsed rather for pleasure then for profit, especially where hot-houses are ouermuch haunted, but I mind not to speake of them in this place, otherwise then to aduertise those that tender their owne health, to be warie and circumspect in resorting vnto them without cause, and immediatly after or with such persons as be vncleane. Know that it is not good to bath the moone being in earthly signes, as in ♉. ♍. or ♑. the reason is because they are of a cold and drie nature, and the nature of Cold is to restraine and bind, and so the moone being in these signes the poores of the body are closed and shut, so that there can be no resolution of humours & superfluities, which by bathing ought to be auoyded.

But in fiery signes, as when the moon is in ♈. ♌. or ♐. then it is good time for bathing, for then the body is apt to resolution, tis the nature of heat, to open & resolue.

It is best bathing. 2. or 3. daies after the change, and at the full of the Moone, for then the superfluities are ripe and ready to auoyd and disposed to flow and issue out, which is indeed the end and vse of Bathing.

If any will enter into the bath onely for cleanelinesse sake let the moone be in ♎ or ♓.

Furthermore if Bathing be vsed for health, let the party grieued learne of the wise Phisition, whether his

his ſickneſſe hath need of moyſtening, or drying, for if it doth require moyſtening, as in Phiſis, and ſuch like, then let him bath in watery ſignes, hauing good aſpects of Iupiter or Venus: But if the ſickneſſe require drying as in Paralyſis and the like, then let him Bath the moone being in fiery ſignes, hauing good aſpects of Mars and the Sunne.

Alſo before you enter into any Bath, your body muſt be firſt purged, for if you goe in vnprepared & vnpurged, peraduenture you may be worſe then before.

The beſt time of the yeare to Bath in, is the Spring and Harueſt, and in the moneth of May and September. The beſt time of the day to goe into the Bath, is one houre after the Sunriſing at the leaſt, alwaies prouided, that you muſt walke either an houre or halfe an houre before, and haue a ſtoole either by nature or art: you muſt couer your head well, ſo long as you be in the Bath, and beware you drinke not cold drinke although you be very thirſty, but forbeare all things that be cold, leaſt when you are hot within, cold ſtrike ſuddenly into ſome principall member and ſo hurt you.

The time of tarying in the Bath, is commonly one houre, yet it may be more or leſſe, according to the nature of the Bath, or ſickneſſe of the party, at the diſcretion of the wiſe Phiſition.

For Purging.

In purging theſe 5. things ought to be knowne

1. The humour which aboundeth.
2. The beſt way to anoyd it.
3. The ſtrength of the perſon.
4. The manner of the ſickneſſe.
5. The force and nature of the medicine.

For when theſe things are not conſidered and obſerued, many perilous accidents may follow, and greatly hurt and grieue the body.

Good signes for purging generally, are Cancer, Scorpio, and Pisces.

Particularly, as with potions, or drinkes, the moone being in Scorpio.

Purge with Electuaries, the Moone being in Cancer.

Purge with Pilles, the Moone being in Pisces.

Take Preparatiues, the Moone being in Gemini, Libra, or Aquarius.

Take vomits, the moone being in Aries, Taurus, or Capricornus.

Take Gargarises, the moone in Aries, Cancer, or Capricornus.

Take Glysters, the moone being in Libra, or Scopio.

To prouoke neesings, the moone being in Cancer, Leo or Libra.

To stop Fluxes, Rhumes, and Laxes, the moone being in Taurus, Virgo, or Capricornus.

Good to comfort the vertue Attractiue, the moone in Aries, Leo, or Sagitarius.

Good to comfort the vertue Digestiue, the Moone being in Gemini, Libra, or Aquarius.

Good to Comfort the vertue Retentiue, the moone being in Taurus, Virgo, or Capricornus.

Good to comfort the vertue Expulsiue, the Moone being in Cancer, Scorpio, or Pisces.

For vsing of vnguents or plaisters, it is best to bee applyed, when the moone is in that signe which gouerneth the same member or part of the body, to which it is applyable.

For Sweatings.

Sweatings as they are of two sorts, that is to say naturall, and artificiall, so they are vsed for two ends and purposes: The naturall Sweat, if good heede be taken

taken in opening of the Pores, will dissolue grosse and thicke humors, will cleanse the blood, will comfort the Spirits, will put away cold, will consume raw humors, qualifie and quench raging feauers; will helpe numnesse, and the dropsie.

The artificiall Sweat, will cleanse scabs, put away itch, amend dulnesse in the hearing, ease the stone, resolue concealed and cold melancholy blood and humors.

But for the better performing, and effectuall working in these causes, the counsell of the learned Phisitian is to be desired and vsed.

The best and meetest signes to sweat in, are Leo, Aries, and Sagitarius, and that two or three dayes after the change, and at the full of the Moone.

And note that sweating, is better to bee done in the euening, then in the morning, for when the body hath nourishment within, the spirits shall not bee drawne vtterly forth, to the extreame parts.

Note further, that leane folkes, and dry or feeble persons must sweate little, for it will hurt them much, but fat folkes may sweate well, and it will doe them much good.

A Briefe Description of the Foure Quarters of this yeare of our Lord God. 1633.

Of Winter.

WInter, (which is the chiefest Capitall for for the Spring, the disgrace of Summer, and the deepe deuourer of the fruitfull Harueſt,) began to take his effects according to our vsuall computation, the 12. day of December in the yeare aforegoing, at the first entrance of the Sun into the first minute of the signe Capricorne, at which time the Sun shall be at his greatest South declination from the Equinoctiall line, so

that

that he riseth South-east, and setteth South-west. Now is the Hiemall or Winter solstice, for the sun is so farre remoued from our Zenith or perticall point, that he cannot decline any further, & stands at a stop or stay: and then is the shortest day & longest night in the yeere, & so this quarter doth continue vntill the 11. of March next following.

This season is by nature cold and moyst, vnpleasant for the most part to trauellers, either by Land or sea, and vntoward persons, it is very combrous & noysome, causing superfluity of rawnesse, and abundance of cold moystnesse to ouerflow their bodyes, to their great troubles and disquietnesse.

The diseases incident to this Quarter, are Agues, Gouts, Poles, hoarsenesse, Catharres, Dropsies, the stone and strangurie, Palsies, Consumptions, and all cold diseases that comes by want of blood, are answerable to the condition of this season.

Thus will the starres if God assent,
Whose power alone, can all preuent.

Of the Spring.

The Sun (which is the eye of the world, the fountayne of light, and the chiefe moderator of all the rest of the lights) hath like a Gyant run his race, & finished his reuolution, (Gradatim) throughout the 12. signes, and now beginneth his iourney afresh againe, & goeth an euen course, and so becomes an indifferent Arbiter betweene the night and the day, and maketh an equality throughout his whole gouernment, to the great ioy & comfort of all his reuined subiects, chearing with his splendant countenance, the poore afflicted weather-worne weeds of this our dark star of mortality, (which the barbued countenance of winters extremity had almost subdude,) with his excellent presence, wherat the

earth

earth begins to smile, and to put on her new apparell, the flourishing linery of fresh Flora.

This season is by nature hot & moyst, the most temperate time of all the yeare, & the least breeder of sicknesse that doth procure death, and a very conuenient time, for the removing of sicknesses and griefes gotten before, and also to anoyd and preuent those that are to come: for now the dull sences & spirits of man & other creatures are quickned and reuiued, and therefore the humors which doe abound, and are readiest to repriue nature are fit to be emptied and auoyded, whether by blood-letting, purging, or otherwise as the learned Physitian shall aduise, and as the cause of the disease shall require, such therefore as be diseased, let them not neglect this time.

Sicknesses like to rage this quarter, are small poxes, measeles, squinances, hot feuers, obstructions, iaundise, pluriſies, and such like as proceed of the corruption of bloud.

Infections from the starres may fall,
But one aboue doth stay them all.

Of Summer.

SUmmer the third part of our vulgar yeare, according to our vsuall computation, now when the Sun hath fully determined the Spring time, with his last grade of Gem: and hath moued in his motion to the highest point of his course, namely to the first degree of Cancer, which shall be this yeere on the 12 of June. Now is the second Solstice of the yeare, called the estiuall or Summer solstice, for euen as the Sunne when he entreth into ♈, hath his greatest South declination from the equinoctiall line: so now at his ingresse into the beginning of Cancer, he hath his greatest declination towards the North from the said equinoctiall line, and

euen

euen then, as at the time of winter solstice he was so far remoued from our vertical point that he could not moue no further towards the South, and was therefore to approach againe toward our North Latitude at which time he seemeth to stand: so now being come so neer our Zenith that hee cannot remoue no further towards the South Latitude. At his first going from vs he seemeth also to stand, insomuch that euen as before at his return towards vs againe hee made with vs the shortest day & longest night in the yeare, so now at his returne from vs he maketh with vs contrari wise, the longest day & shortest night in the yeere: And afterwards declineth more & more from vs, like as before he moued more toward vs.

This season according to his proper nature, is hoat & dry, turning the humours of mens bodies, from coldnesse and moysture, into hoatnesse and drynesse, resembling the Element of fire & complexion of choller, bringing all fruits to their ripenesse, cattle to their fatnesse, and men to their wealth.

Griefes incident to this quarter are burning feuers, hot inflamations, choleriche vomitings, fluxes, pimples, of the face, obstructions, laundise, many sharpe diseases, and other distemperatures.

Though starres incline to worke vs ill.
All shall be as the maker will.

Of Autumne.

AUtumne, according to our accustomed computation the last quarter of this yeere, beginneth at the suns departure from the last scruple of Virgo into the first degree of the second equinoctiall signe Libra, the which will bee this yeare on the Foureteenth day of September, the day and night being of an equall length as in the Spring: At which time is the Autumnall Equinoctiall

noctiall, for euen as at the Sunnes entrance into Aries, the day by increasing from the winter Solstice till then, came to bee equall with the night, going on still more and more till the Summer Solstice, when was the longest day and shortest night. So now the night by increasing from the Estiuall Solstice, to this the Sunnes ingredience into Libra, hath got to be equall with the day, and shall increase more and more till the brumall Solstice come againe, when the night is longest and the day shortest. This time of the yeare, is of it selfe vnconstant and variable, warme in the day time and cold in the night. This quarter because of the inequality of temperature, may as Hippocrates saith, bee called the mother or nurse of deadly sicknesses. And Galen saith, that this time of the yeare is very dangerous for taking of sicknesses.

The infirmities subiect to this quarter, are obstructions, quartaine Agues, Hemrods, Dropsies, Vertigo, Falling sicknesse, with other melancholly diseases, which the Lord deliuer vs from, Amen.

Thus euery planet in his kinde,
Is to performe the Almighties minde.

A Declaration of the inclination and disposition of the winds and weather, according to the diuers motions and influences of the erratical and fixed starres: with the day, houre, and minute of the change of the Moone, her full and quarters: and also of the rising and setting of the Sunne, in euery Seuenth day of euery Moneth of this present yeare of our Lord God. 1633.

Aprils

Aprils Abstract.

In this moneth of Aprill, the poores of mans body are opened, and apt to receiue physicke: and they that refuse the same, I commit them to the bene fitt of nature for of all tymes of the yeare, this is the best time to preuent causes of sicknesses, or for speedy remedie in extreamities, for now nature doth renew strength through all the body: for where sickenesse happeneth, shee soone vnburdeneth by the meanes of Physicke: wherefore what it cannot doe now, it will hardly bee done hereafter, therefore take tyme now whilst time is, &c.

As yet you may graft and proine vines, and also set Melons, Cowcumbers, Citrons, Artichokes, and pole vp hopps, sow Barly, Tanners apply themselues to barking of Trees, &c.

Last quarter the 20 day 22 minu: after 2 morning, apt for the season.

New Moone the 27 day 47 min: after 5 afternoon, inclined to showers.

Mayes Abstract.

In this moneth rise early, for May doth not loue any sluggards, and let such as be in health and able, walke into the field, and to eate and drinke betimes is good and wholsome, abstayne from all meates that be

ek a hot nature, and such as bee sicke, it is very good time of the yeare to be let blod or take physicke. Such as be whole, God keepe them in health, and such as be sicke, God send them good Physitions and physicke.

The tyme is now fitting to sow Wazill, marigrons, and such fine seedes, as before might not be sowne, because of the coldnesse of the weather, set Sage according to the proverbe, set Sage in May, and it will last alway, sow flaxe and hempe, set hartichokes, weede your Hoppes and Gardens, see to your grafts that no superfluous branches trouble them: May dew, Rosemary flowers, and Beane flowers, may at your pleasure be distilled this moneth, and now also haue a care of watching your Bees.
